No problem. I will get them working on them. The maps that I have sent to you just show sample locations (no streets, parcels, etc.). This should not be a problem. When I get a draft map together from our side I will send it over.

Thanks. I'll get to a computer to look at them. The public meeting is next Tuesday. We have a meeting here on the 25th to finalize things.

I'll look at these but it would be great to overlay (or whatever the proper GIS word is) with the groundwater plume. And the sat image.

Greg,
Attached are the maps created by Beacon Environmental. They are basic maps showing the sample locations. Do you need to see parcel information? I will get our GIS group to start working on incorporating the groundwater plume information. When is your public meeting?

Derrick,

Harry O'Neill asked that I send you these preliminary maps that show the results from the passive soil-gas samples we collected in Grand Prairie, TX.

Attached is an Adobe PDF file containing the base map and color isopleth maps.
